Contents of Volume 52

Volume 52, Number 1, May 1, 1973

AUTHOR INDEX, Volume 52, Number 1	ii
SARYU N. DIXIT and HOWARD B. BENSUSAN. The Isolation of Crosslinked Peptides of Collagen Involving $\alpha 1$ -CB6	1
P.L. MOLLOY, NEIL HOWELL, D.T. PLUMMER, ANTHONY W. LINNANE, and H.B. LUKINS. Mitochondrial Mutants of the Yeast <i>Saccharomyces cerevisiae</i> Showing Resistance <i>in Vitro</i> to Chloramphenicol Inhibition of Mitochondrial Protein Synthesis	9
J.L. HOLTZMAN, R.R. ERICKSON, R.K. DEWAN, and V.A. BLOOMFIELD. Inelastic Laser Light Scattering and Particle Size of Detergent-Treated Microsomes	15
NABEEL NAHAS and ALISA GUTMAN. <i>In Vitro</i> Activation of Leukocyte Glycogen Synthetase	21
C.M. BAUGH, C.L. KRUMDIECK, and M.G. NAIR. Polyglutaminyl Metabolites of Methotrexate	27
YOSHIKAZU NAKAMURA and AKIRA WADA. Effect of a Bifunctional Imidoester on Dissociation of 70S Ribosomes in <i>Escherichia coli</i>	35
JERRY H. ROBERTS, PATRICIA STARK, and MARK SMULSON. Stimulation of DNA Synthesis by Adenosine Diphosphoribosylation of HeLa Nuclear Proteins during the Cell Cycle	43
C.G. CURTIS, P. STENBERG, C-H.J. CHOU, A. GRAY, K.L. BROWN, and L. LORAND. Titration and Subunit Localization of Active Center Cysteine in Fibrinoligase (Thrombin-Activated Fibrin Stabilizing Factor)	51
GERALD YARRISON and G.L. CHOULES. Reassociation of Membrane Glycoprotein with Intact Erythrocytes	57
N. YANAIHARA, T. HASHIMOTO, C. YANAIHARA, K. TSUJI, Y. KENMOCHI, F. ASHIZAWA, T. KANEKO, H. OKA, S. SAITO, A. ARIMURA, and A.V. SCHALLY. Syntheses and Biological Evaluation of Analogs of Luteinizing Hormone-Releasing Hormone (LH-RH) Modified in Position 2, 3, 4, or 5	64
A. GÓMEZ-PUYOU, F. SANDOVAL, B. LOTINA, and M. TUENA DE GÓMEZ-PUYOU. Guanidine Sensitive Transport of Na^+ and K^+ in Mitochondria	74
JEFFREY M. GILBERT. Translation of Messenger RNA Fractions Extracted from Free and Membrane Bound Rat Forebrain Ribosomes in a Rabbit Reticulocyte Cell-Free System	79
T.S. PAPAS, L. SANDHAUS, M.A. CHIRIGOS, and E. FURASAWA. Inhibition of DNA Polymerase of Avian Myeloblastosis Virus by an Alkaloid Extract from <i>Narcissus tazetta</i> L.	88
RICHARD W. WALTER, JR., and RICHARD L. ANDERSON. Evidence That the Inducible Phosphoenolpyruvate: D-Fructose 1-Phosphotransferase System of <i>Aerobacter aerogenes</i>	93
P.B. SOMMERS, M.J. KRONMAN, and K. BREW. Molecular Conformation and Fluorescence Properties of α -Lactalbumin from Four Animal Species	98
SERGIO JIMENEZ, MARGARET HARSCH, and JOEL ROSENBLOOM. Hydroxyproline Stabilizes the Triple Helix of Chick Tendon Collagen	106
RICHARD A. BERG and DARWIN J. PROCKOP. The Thermal Transition of a Nonhydroxylated Form of Collagen. Evidence for a Role for Hydroxyproline in Stabilizing the Triple-Helix of Collagen	115
RENU KHANNA and S.K. SINHA. Change in the Predominance from C_4 to C_3 Pathway Following Anthesis in Sorghum	121
S.R. WAGLE and W.R. INGEBRETSEN, JR. Stimulation of Glycogenolysis by Epinephrine and Glucagon and Its Inhibition by Insulin in Isolated Rat Liver Hepatocytes	125
F.C.G. van de VEERDONK and E. BROUWER. Role of Calcium and Prostaglandin (PGE_1) in the MSH-Induced Activation of Adenylate Cyclase in <i>Xenopus laevis</i>	130
TERRANCE G. COOPER and ROBERT LAWTHER. Induction of the Allantoin Degradative Enzymes by Allophanic Acid, the Last Intermediate of the Pathway	137
SAMUEL I. BEALE and PAUL A. CASTELFRANCO. ^{14}C Incorporation from Exogenous Compounds into δ -Aminolevulinic Acid by Greening Cucumber Cotyledons	143
FREDERIC A. TROY, INDER K. VIJAY, and THOMAS G. KAWAKAMI. Cyclic-3',5'-Amp-Dependent and Independent Protein Kinase Levels in Normal and Feline Sarcoma Virus Transformed Cells	150
RON FILLER and GERALD LITWACK. Differences in Macromolecular Binding between Cyclic AMP and Its Dibutyl Derivative <i>in Vitro</i>	159
D. HORNIG, F. WEBER, and O. WISS. Site of Intestinal Absorption of Ascorbic Acid in Guinea Pigs and Rats	168
CLARK BUBLITZ. Effects of Lipids on Cyclic-Nucleotide-Phosphodiesterases	173
GERALD LITWACK and SHEILA ROSENFELD. Coenzyme Dissociation, a Possible Determinant of Short Half-Life of Inducible Enzymes in Mammalian Liver	181
W.R. BRENNEMAN and WALTER RATHKAMP. Release of Thyroid Stimulating Hormone from Chick Anterior Pituitary Glands by Thyrotropin Releasing Hormone (TRH)	189

TAKEHIKO WATANABE and MARTIN FLAVIN. Two Types of Adenosine Triphosphatase from Flagella of <i>Chlamydomonas reinhardtii</i>	195
IONE POLACOW and ROBERT T. SIMPSON. Circular Dichroism Spectra of Putative Transcribed and Repressed Chromatin	202
B.F. ERLANGER, N.H. WASSERMANN, and A.G. COOPER. Allosteric Activation of Chymotrypsin-Catalyzed Hydrolysis of Specific Substrates	208
MURRAY P. DEUTSCHER. A Novel Nucleolytic Activity Associated with Rabbit Liver tRNA Nucleotidyl-transferase	216
NEAL A. SHORT, EUGENE G. SANDER, and OWEN M. RENNERT. Isoprenylation of Transfer Ribonucleic Acid	223
JAN ANDRASKO and STURE FORSÉN. Pulsed NMR Studies on Na ⁺ Binding to Simple Carbohydrates	233
ASOKE C. GHOSE. Thermally Induced Structural Transitions of the Variable and Constant Halves of Bence-Jones Proteins: Fluorimetric Studies	240
G. LYNIS DOHM and EDWARD B. TAPSCOTT. Oxaloacetate Inhibition of Succinate Oxidation in Tightly Coupled Liver Mitochondria with Ferricyanide as an Electron Acceptor	246
HIDEYA ENDO and KOICHI TAKAHASHI. A Nitrosated Arginine Derivative, A Powerful Mutagen	254
NAJMA ZAHEER BAQUER, MARIA CASCALES, BOON CHAN TEO, and PATRICIA McLEAN. The Activity of the Pentose Phosphate Pathway in Isolated Liver Cells	263
WIKTOR RZECZYCKI and ENRIQUE VALDIVIA. Mitochondria Uncoupling Effect of Halothane Dependent on Magnesium	270
C.L. GREENSTOCK, J. RALEIGH, E. McDONALD, and R. WHITEHOUSE. Nucleotide Radical Oxidation and Addition Reactions with Cellular Radiosensitizers	276
J.D. STINNETT, L.F. GUYMON, and R.G. EAGON. A Novel Technique for the Preparation of Transport-Active Membrane Vesicles from <i>Pseudomonas aeruginosa</i> : Observations on Gluconate Transport	284
M.F. MAYLIÉ, M. CHARLES, M. ASTIER, and P. DESNUELLE. On Porcine Pancreatic Colipase: Large Scale Purification and Some Properties	291
FRANK McCAPRA and DAVID W. HYSERT. Bacterial Bioluminescence-Identification of Fatty Acid as Product, Its Quantum Yield and a Suggested Mechanism	298
ULLA KRUG, MORLEY D. HOLLENBERG, and PEDRO CUATRECASAS. Changes in the Binding of Concanavalin A and Wheat Germ Agglutinin to Human Lymphocytes during <i>in Vitro</i> Transformation	305
NORBERT I. SWISLOCKI, SUSAN SCHEINBERG, and MARTIN SONENBERG. Interaction of Liver Plasma Membranes and GTP with GTP Hydrolysis	313
GARY S. COBON and J.M. HASLAM. The Effect of Altered Membrane Sterol Composition on the Temperature Dependence of Yeast Mitochondrial ATPase	320
F. TURNOWSKY, J. DREWS, F. EICH, and G. HÖGENAUER. <i>In Vitro</i> Inactivation of Ascites Ribosomes by Colicin E 3	327
DIETER VOGEL. Evidence for a Rapid Structural Change in TMV-A-Protein Near Neutrality	335
ERRATA	342

Volume 52, Number 2, May 15, 1973

AUTHOR INDEX, Volume 52, Number 2	ii
K. YOU and Y. HATEFI. Inhibition by Avidin of the ATP-Pi Exchange Activities Associated with Preparations of Energy Transfer Factors A and A'D.	343
TETSUO TORAYA, MASAOKI UESAKA, MASAO KONDO, and SABURO FUKUI. Dissociation of Diol Dehydrase into Two Different Protein Components.	350
A.R. GLENN and A.R. GOULD. Inhibition of Lipid Synthesis in <i>Bacillus amyloliquefaciens</i> by inhibitors of Protein Synthesis.	356
PETER SETLOW. Inability to Detect Cyclic AMP in Vegetative or Sporulating Cells or Dormant Spores of <i>Bacillus megaterium</i>	365
ANNE M. MORIN and MAURICE LISS. Evidence for a Methylated Protein Intermediate in Pituitary Methanol Formation.	373
T. BILINSKI and W. JACHYMCZYK. The Influence of Mitochondria on Ribosomes. Cycloheximide Resistance of Ribosomes from Petite Mutants of <i>Saccharomyces cerevisiae</i>	379
FRED C. HARTMAN and R.W. GRACY. An Active-Site Peptide from Human Triose Phosphate Isomerase.	388
E.J. PECK, JR., J.M. SCHAEFFER, and J.H. CLARK. γ -Aminobutyric Acid, Bicuculline, and Post-Synaptic Binding Sites.	394

CLARK F. SPRINGGATE, NARAYANA BATTULA, and LAWRENCE A. LOEB. Infidelity of DNA Synthesis by Reverse Transcriptase.	400
J.K. FAWCETT, NORMAN CAMERMAN, and ARTHUR CAMERMAN. Thyroid Hormone Structure: Molecular Conformation of 3'-Isopropyl-3, 5-Diiodo-L-Thyronine, the Most Potent Known Thyromimetic Agent.	407
INGEMAR BJÖRKHEM, HANS JÖRNVALL, and EILA ZEPPEZAUER. Oxidation of ω -Hydroxylated Fatty Acids and Steroids by Alcohol Dehydrogenase.	413
JAN RYDSTRÖM, JAN B. HOEK, and BO HÖJEBERG. Ca^{2+} -Dependent Allosteric Regulation of Nicotinamide Nucleotide Transhydrogenase from <i>Pseudomonas aeruginosa</i>	421
VIVIAN CODY and W.L. DUAX. Distal Conformation of Thyroid Hormones. The Crystal Structure of 3, 5, 3'-Triiodothyroacetic Acid N-Diethanolamine (1:1) Complex.	430
W.C. KENNEY, D. EDMONDSON, R. SENG, and T.P. SINGER. Structure of the Flavin Site of Chromatium Flavocytochrome c_{552}	434
MICHAEL N. KAZARINOFF and DONALD B. McCORMICK. N-(5'-PHOSPHO-4'-PYRIDOXYL) AMINES AS SUBSTRATED FOR PYRIDOXINE (PYRIDOXAMINE) 5'-PHOSPHATE OXIDASE.	440
DAVID J.T. PORTER, GUNTER BLANKENHORN, and LLOYD L. INGRAHAM. The Kinetics of Lumiflavin Reduction by N-Methyl-1,4-Dihydronicotinamide: Direct Evidence for a Preequilibrium Complex Between Oxidized Lumiflavin and N-Methyl-1,4-Dihydronicotinamide.	447
DAVID ZAKIM, JOVITA GOLDENBERG, and DONALD A. VESSEY. Kinetic Properties of Microsomal UDP-Glucuronyltransferase. Regulation by Metal Ions.	453
O.V. RAJARAM, P. FATTERPAKER, and A. SREENIVASAN. Occurrence of α -Tocopherol Binding Protein in Rat Liver Cell Sap.	459
N.E. GARRETT, R.J. BURRIS GARRETT, and J.W. ARCHDEACON. Solubilization and Chromatography of Iron-Binding Compounds from Reticulocyte Stroma.	466
D.R. HEWISH and L.A. BURGOYNE. The Calcium Dependent Endonuclease Activity of Isolated Nuclear Preparations. Relationships between Its Occurrence and the Occurrence of Other Classes of Enzymes Found in Nuclear Preparations.	475
SEI-ICHIRO IKEDA and SABURO FUKUI. Preparation of Pyridoxal 5'-Phosphate-bound Sepharose and Its Use for Immobilization of Tryptophanase.	482
KOICHI KUBOTA, HIROSHI YAMAKI, and TOSHIO NISHIMURA. Functional Interaction of Free Polyrribosomes with the Membrane of the Endoplasmic Reticulum in a Cell-Free Protein-Synthesizing System from Plasmacytoma X5563.	489

AUTHOR INDEX, VOLUME 52	1495

Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to clearly emphasize the novel aspects of the information reported, with the understanding that the same material has not been, nor will be, submitted for publication elsewhere.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover.

To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8.5×11 in. high quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

Summary. Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100-150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp, clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division and punctuation.

Manuscripts should be double-spaced on one side of the sheet; **references, footnotes and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6.5 in. wide and 9.5 in. long.

Symbols and Abbreviations defined in the Commission on Biochemical Nomenclature Document No. 1 (*Arch. Biochem. Biophys.* (1966) **115**, 1-12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be created in accordance with the rules of the NAS-NRC Office of Biochemical Nomenclature and **must be defined in a footnote**, rather than in the text. Such abbreviations **must not** be used in the Summary. The improper use of abbreviations may necessitate the return of manuscripts for retyping, thereby delaying publication.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g., ATPase). Use of the Enzyme Commission ("EC") code number is recommended.

Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals. The symbol for the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [^{32}P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the *Archives of Biochemistry and Biophysics* (1973) **154**, iii-xii. Reprints are available from the Publisher.

Footnotes should be typed single-spaced at the foot of the page on which they are mentioned in the text. References and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. **Do not attempt to insert figures, figure legends or tables into the text.** This will be done by the Publisher.

All drawings should be done with a mechanical lettering set (e.g., Leroy; lettering size 120 or 140) and black ink. Do not use press-on lettering; typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5×8 in.); the original drawings must be planned accordingly.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even *black* density.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

Page Numbers and Headings. Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index*, 1969. Note the following examples.

For a journal article:

1. Chatteraj, D. K., and Bull, H. B. (1971) *Arch. Biochem. Biophys.* **142**, 363-370.

For a book by one or more authors:

2. Robison, G. A., Sutherland, E. W., and Butcher, E. (1971) *Cyclic AMP*, pp. 298-302, Academic Press, New York.

Note that inclusive pagination must be given.

Mailing. To avoid creasing, please place manuscripts between cardboards when mailing.

Acknowledgment of Receipt. Authors desiring acknowledgment of receipt of manuscript should enclose a stamped self-addressed card.

Reprints. Reprint order forms are sent to the authors immediately upon acceptance of their manuscript. The price list is included.
